

HAZELDENE SCHOOL

Supporting pupils at school with Medical Conditions Policy Updated July 2016

SIGNED DATE.....
HEADTEACHER

SIGNED DATE

CHAIR OF GOVERNORS

TO BE REVIEWED NOVEMBER 2017

Policy for Supporting Pupils at School with Medical Conditions

At Hazeldene School, we will have due regard to the following documents:

- Department for Education's statutory guidance, 'Supporting pupils at school with medical conditions', April 2014 (This statutory guidance also refers to other specific laws.)
- Children and Families Act 2014 (Section 100)
- Equality Act 2010
- Special Educational Needs Code of Practice
- Other school policies, such as Child Protection, Equal Opportunities,
- Administering Medicines and Special Educational Needs.

Introduction

At Hazeldene School, children with medical conditions, in terms of both physical and mental health, will be properly supported in school so that they can:

- play a full and active role in school life
- remain as healthy as possible
- achieve their academic potential
- Access and enjoy the same opportunities at school as any other child.

We recognise that pupils with long-term and complex medical conditions may require on-going support, medicines or care while at school to help them to manage their condition and keep them well. Others may require monitoring and interventions in emergency circumstances. We recognise that each child's needs are individual and may change over time.

Their medical condition may result in extended absence from school. The school will make every effort to minimise the impact on a child's educational attainment and support his or her emotional and general well-being, including any necessary reintegration programmes. Sometimes it may be necessary for the school to work flexibly, and may, for example, involve a combination of attendance at school and alternative provision.

The school recognises that some children who require support with their medical conditions may also have special educational needs and may have a Statement or Education, Health and Care Plan (EHCP).

We will work together with other schools, health professionals, support services, and the Local Authority.

The admission to school is conducted by Bedford Borough Council. No child with a medical condition will be denied admission on the grounds that arrangements for his or her medical condition have not been made. In line

with the school's safeguarding duties, the school does not have to accept a child in school at times where it would be detrimental to the health of that child or others to do so, eg where a hospital has advised a child to remain at home but the parent chooses to send them to school.

Policy Implementation

- The Headteacher will ensure that sufficient staff are suitably trained
- All relevant staff will be made aware of the child's condition
- Cover arrangements will be put in place to cover for staff absence, to ensure that someone is always available
- Supply teachers will be briefed
- Risk assessments will be put in place for educational visits, and other school activities outside the normal timetable
- Individual healthcare plans will be monitored frequently

At Hazeldene we have fully qualified paediatric first aiders who are responsible for dealing with any serious first aid matters and can be called upon to offer advice whenever required.

They are:-

- Aysha Magre
- Joanne Bedwell
- Alison Button
- Vicky White
- Belinda Edgeworth
- Jo Riley
- Sharon Logue
- Jeanette Pocock
- Sam Marlton
- Nicola Ford
- Tracey Eagles
- Geraldine Skeel
- Nola Donaldson
- Nikki Sangster
- Alex Redford
- Jackie Taylor

The emergency aiders who hold the full first aid at work training are:

- Jeanette Pocock
- Tina Jeffers
- Sharon Logue

- Tracey Eagles
- Belinda Edgeworth

In addition to this the majority of the mid day assistants have also undertaken basic first aid training November 2014. (Expiry Oct 2017) Joanne Bedwell is responsible for First Aid at break times and lunchtimes and is based in our First Aid Room.

First aid training is carried out in line with current Health and Safety recommendations. This is every 3 years to re-qualify as a first aider and annually in emergency first aid.

Procedure to be followed when notification is received that a pupil has a medical condition

- The school, in consultation with all relevant stakeholders including parents, will: Provide support to pupils where it is judged by professionals that there is likely to be a medical condition. Where evidence conflicts, some degree of challenge may be necessary to ensure that the right support can be put into place.
- Put arrangements into place in time for the start of the new school term if it is a child starting at the school
- In other cases, such as a new diagnosis or children moving to a new school mid-term, every effort will be made to ensure that arrangements are in place within two weeks.
- Ensure that arrangements are put into place to cover transition from another setting, upon being notified that a child is coming into school with a medical condition. These may vary from child to child, according to existing Health Care Plans
- Ensure that arrangements are implemented following reintegration into the school or when the needs of a child change.
- Any staff training needs are identified and met.

Individual Healthcare Plans

The purpose of IHCPs is to provide clarity about what needs to be done, when and by whom. They are particularly essential in cases where conditions fluctuate or where there is a high risk that emergency intervention will be needed. IHCPs are devised with the child's best interests in mind, ensuring that an assessment of risk to the child's education, health and social well-being is managed minimising disruption.

IHCPs, and their review, may be initiated, in consultation with the parent, by a member of school staff or a healthcare professional involved in providing care for the child.

Plans will be drawn up in partnership between the school, parents, and relevant healthcare professionals, eg. specialist or community nurse. Wherever possible, the child will also be involved in the process. Partners should agree who will take the lead in writing the plan, but responsibility for ensuring the plan is finalised and implemented rests with the school. The IHCP is a confidential document and the level of detail will depend on the complexity of the child's condition and the degree of support needed. Where a child has a special educational need, but does not have a Statement or EHCP, their special educational needs will be mentioned in their IHCP. If they have an EHCP, the C will be linked to it, including at review times. The IHCPs are reviewed at least annually, or earlier if evidence is presented that the child's needs have changed or there are arising difficulties. However, not all children with a medical condition will require an IHCP. The school, healthcare Professionals and parents should agree, based on evidence, when a healthcare plan would be inappropriate or disproportionate. If consensus cannot be reached, the headteacher will take the final view. A flow chart for agreeing an IHCP is provided in Annex A.

The information to be recorded on IHCPs

When deciding on the information to be recorded on individual healthcare plans, the following will be considered:

- the medical condition, its triggers, signs, symptoms and treatments;
- the pupil's resulting needs, including medication (dose, side-effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues eg. crowded corridors
- specific support for the pupil's educational, social and emotional needs - for example, tests, use of rest periods or additional support in catching up with lessons, counselling sessions
- the level of support needed, including in emergencies. If a child is self managing their medication, this should be clearly stated with appropriate arrangements for monitoring
- who will provide the support, their training needs, expectations of their role and confirmation of proficiency to provide support for the child's medical condition from a healthcare professional; and cover arrangements for when they are unavailable.
- who in the school needs to be aware of the child's condition and the support required.

- arrangements for written permission from parents and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours.
- separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the child can participate, eg. risk assessments
- where confidentiality issues are raised by the parent or child, the designated individuals to be entrusted with information about the child's condition
- what to do in an emergency, including whom to contact, and contingency arrangements. (Some children may have an emergency healthcare plan prepared by their lead clinician that could be used to inform the development of their IHCP)

Roles and responsibilities

Supporting a child with a medical condition during school hours is not the sole responsibility of one person. The school will work collaboratively, both with staff within the organisation and with outside agencies, as the circumstances of each child dictate.

Governing Body

The Governing Body will ensure that:

- pupils in school with medical conditions are supported
- a policy is developed, implemented and monitored.
- staff receive suitable training and that they are competent before they take on the responsibility to support children with medical conditions.

Headteacher

The Headteacher will ensure that:

- the Supporting Pupils with Medical Conditions Policy is developed and effectively implemented with partners
- all staff are aware of the policy and that they understand their role in implementing the policy.
- all staff who need to know are aware of a child's condition
- sufficient trained numbers of staff are available to implement the policy and deliver against all the IHCPs, including in contingency and emergency situations.
- the development of IHCPs is carried out
- all staff are appropriately insured to support pupils in this way

- liaison with the school nurse is carried out in respect of a child who has a medical condition, including in cases where the situation has not yet been brought to the attention of the school nursing service.

School Staff

- Any member of the school staff may be asked to provide support to pupils with medical conditions, including the administration of medicines, although they cannot be required to do so. Although administering medicines is not part of a teachers' professional duties, they should take into account the needs of pupils with medical conditions they teach.
- any member of school staff should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

School Nurses

- They should notify school when a child has been identified as having a medical condition which will require support in school
- They can support staff on implementing a child's IHCP and provide advice and liaison e.g. training
- They can liaise with lead clinicians on appropriate support

Other healthcare professionals, including GPs and paediatricians

- They should notify the school nurse when a child has been identified as having a medical condition that will require support at school
- They can advise on IHCPs

Pupils

- Pupils with medical conditions may be best placed to provide information about how their condition affects them.
- They should be involved in discussions about their medical support needs and contribute as much as possible to the development of their IHCP.
- They should comply with their IHCP
- other children will often be sensitive to the needs of those with medical conditions.

Parents

- Parents should provide the school with sufficient and up-to-date information about their child's medical needs.
- They may, in some cases, be the first to notify the school that their child has a medical condition.
- They will be involved in the development and review of their child's IHCP.
- They should carry out the action they have agreed to as part of its implementation, eg. provide medicines and equipment
- They should ensure they or another nominated adult are contactable at all times.

Local Authority

- has a duty to commission a school nurse service
- should provide support, advice and guidance, including suitable training for school staff
- work with schools to support pupils to attend full time
- provide alternative arrangements for education if a child cannot attend school because of their health needs (when it is clear that a child will be away from school for 15 or more days, whether consecutive or cumulative across the school year)

Providers of Health Services, Clinical Commissioning Groups

- All of these agencies should co-operate with schools that are supporting children with a medical condition (eg information, advice, training)

Staff training and support

- All members of staff providing support to a child with medical needs will have been trained beforehand so that they are competent and have confidence in their ability.
- Only the trained staff will be able to give prescription medicines or undertake health care procedures.
- It must be noted that a First Aid certificate alone will not suffice for training to support children with medical conditions.
- The type of training, and frequency of refresher training, will be determined by the child's medical condition and the staff's existing knowledge
- The relevant healthcare professional will normally lead on identifying and agreeing with the school, the type and level of training required and how this can be obtained.

- Parents can provide advice but they will not be the sole trainer
- Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.
- All staff will be made aware of children with an IHCP and who the trained staff are.
- The Supporting Pupils with Medical Conditions Policy will be subject to whole staff consultation as part of the draft, and subsequent reviews. All members of staff will be informed of it and it will be included in the induction arrangements for new staff to the school.

The child's role in managing their own medical needs

- children who require medication or other procedures will be supervised in administering them or receive them from a relevant member of staff.
- If a child refuses to take medicine or carry out a medical procedure, staff will not force him or her to do so, but follow the procedure agreed in the IHCP. Parents will be informed so that alternative options can be considered.

Managing medicines on school premises

Where clinically possible, medicines should be prescribed in dose frequencies which enable them to be taken outside school hours. Where this is not possible, the following will apply:

- Medicines will only be administered at school when it would be detrimental to a child's health or school attendance not to do so.
- The school will keep a written record of doses administered, stating what, how and how much was administered, when and by whom.
- No child will be given prescription or non-prescription medicines without their parent's written consent
- Non-prescription medicines will be administered by parents, should they be needed during the school day.
- For the administering of non-prescription medicines during an educational visit, parents should provide written consent.
- No child will be given a medicine containing aspirin unless it has been prescribed by a doctor.
- The school will only accept prescribed medicines that are in-date, labelled, provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage. The exception to this is insulin which must be in-date, but will generally be available to schools inside an insulin pen or pump, rather than its original container.

- Medicines will be stored safely and be readily accessible to involved staff.
- Children who need to access their medicines immediately, such as those requiring asthma inhalers, will know where they are kept.
- On educational visits, medicines will also be available and they will be looked after by a relevant member of staff.
- If a controlled drug has been prescribed, it will be kept securely and stored in a non-portable container. Named staff only will have access to such medication so that it can be administered to the specific child.
- Any side effects of the medication to be administered will be noted and parents informed.
- When no longer required, medicines will be returned to the parent to arrange for safe disposal.

A record form for parental consent to staff administering medicines is provided in Annex C.

Emergency procedures

- A child's IHCP will clearly define what constitutes an emergency and the action to be taken, including ensuring that all relevant staff are aware of emergency symptoms and procedures.
- It may be necessary to inform other pupils in general terms so that they can inform a member of staff immediately if they think help is needed.
- If a child is taken to hospital, staff should stay with the child until the parent arrives, or accompany a child taken to hospital by ambulance.
- Accurate information about the child will be provided to the emergency services at the call out stage, during any first response stage, or subsequent moving on to hospital.

Educational visits and sporting activities

- The school will consider how a child's medical condition will impact on their participation. We will encourage all children to participate according to their ability and make any necessary reasonable adjustments, unless evidence from a clinician, such as a GP, states that this is not possible.
- The school will consider what reasonable adjustments may need to be made after carrying out a risk assessment so that planning arrangements take account of any steps needed to ensure that children with medical conditions are included. This will require

- consultation with parents and pupils and advice from the relevant healthcare professional to ensure that pupils can participate safely.
- It is the responsibility of the teacher in charge to take a first aid bag with them on the visit.
 - Small first aid packs are available in the staffroom and in bags used by the midday assistants. All teachers taking children out of school for a trip or residential visit are equipped with a first aid pack and will carry any medication needed for individual children.

Unacceptable practice

Although school staff should use their discretion and judge each case on its merits with reference to the child's IHCP, it is not generally acceptable practice to:

- Prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary
- Assume that every child with the same condition requires the same treatment
- Ignore the views of the child or their parents; or ignore medical evidence or opinion, (although this may be challenged)
- Send children with medical conditions home frequently or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHCPs
- If the child becomes ill, send them to the school office or headteacher's office unaccompanied or with someone unsuitable
- Penalise children for their attendance record if their absences are related to their medical condition eg. Hospital appointments;
- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively;
- Require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their child, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs
- Prevent children from participating, or create unnecessary barriers to children participating in any aspect of school life, including educational visits, e.g. by requiring parents to accompany the child.

Liability and indemnity

The Governing Body at Hazeldene School ensures that appropriate insurance is in place and that it reflects the level of risk. The insurance covers staff providing support to pupils with medical conditions, with administration of medication and any necessary health care procedures. Any requirement of the insurance company, eg training for staff, will be complied with.

Complaints

Parents who are dissatisfied with the support provided should discuss their concerns directly with the school. If, for whatever reason, this does not resolve the issue, they should make a formal complaint via the school's complaints procedure.

Other issues for consideration

- The school has a number of trained First Aiders amongst the staff. Other members of staff have also been trained in CPR. However October 2014 we purchased a portable defibrillator and training has been put in place
- The school will consider having asthma inhalers for emergency use once the regulations are changed by the Department for Health.

Annex A

Flow Chart for developing Individual Healthcare Plans (IHPs) (*from DfE Guidance*)

Parent or healthcare professional informs school that child has been newly diagnosed, or is due to attend new school, or is due to return to school after a long-term absence, or that needs have changed.

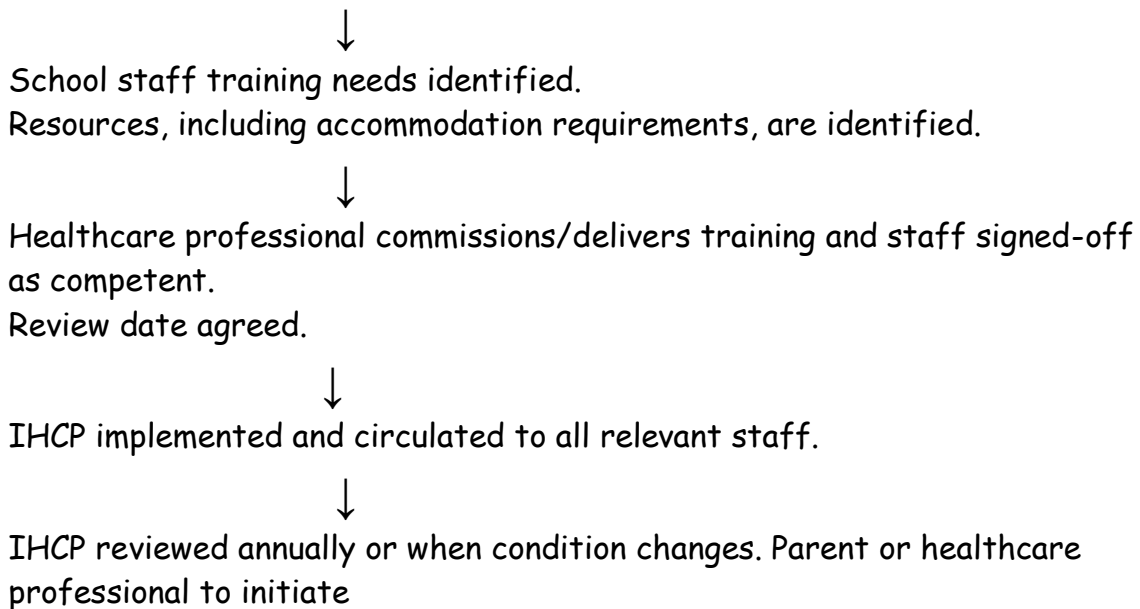

Headteacher &/or SENDCO co-ordinates meeting to discuss child's medical support needs; and identifies members of school staff who will provide support to pupil.

Meeting to discuss and agree on need of IHCP to include key school staff, child (where appropriate), parent, a relevant healthcare professional and other medical/health clinicians as appropriate (or to consider written evidence provided by them). **NB A healthcare professional must attend.**

Develop IHCP in partnership - agree who leads on writing it. Input from healthcare professional must be provided.

Annex B
HAZELDENE SCHOOL
HEADTEACHER: Mrs Helen Ward

Dear Parents

The Administration of Medicine within school

It is important for the safety of our children that school has a safe, clear, smooth-running system of administering medicines to children during the school day.

The policy document has recently been updated and the new procedure is outlined below.

There are two main sets of circumstances when parents require medication to be administered to children in school:

- cases of chronic illness or long-term conditions such as asthma or diabetes;
- cases where children are recovering from a short-term illness but are fit enough to come to school although require the completion of a course of medication, e.g. antibiotics. Where possible, it is preferable that parents (or an adult nominated by the parent) administers' medication to their children. However, there are times when this might not be practicable and we will therefore administer the medicine . Please note we will only administer the medicine when it is prescribed to be taken four times in twenty four hours.

In these cases a written request must be made for medicine to be administered to your child in school. Each request will be considered on its merits. No organisation can insist that staff members administer medicine;

however, our staff have agreed to administer medication in line with Bedford Borough Council Health and Safety guidelines and procedures outlined below:

It is the parent's responsibility:

- To ensure the appropriate form 'request for school to give medication' (available from Mrs E Norman, our office manager) to be completed and approved;

- Once approved, to hand the medication to the above, clearly labelled with the owner's name, contents, and dosage, in the smallest practicable amount. No medicine can be accepted from a child;

- To collect the medication at the end of the day and to ensure that it is returned each day for the agreed period of administration.

The purpose and clarity of these procedures is important in ensuring the safety of all the children.

For your information we have included a copy of the 'Request for School to give Medication' form on the reverse of this letter.

Thank you for your support.

Yours sincerely

Helen Ward

Hazeldene School

Annex C Administration of Medicines

Parental Consent for Staff at Hazeldene School to Administer Medicine

The school will not give your child medicine unless you complete and sign this form agreeing to your child being given the prescribed medication.

Note: Medicines must be in the original container as dispensed by the pharmacy

Child's name -----

Year Group -----

Medical condition or illness -----

Medicine

Name/type of medicine/strength -----

(as described on the container)

Dosage and method -----

Timing - when to be given -----

Any other instructions eg storage -----

Are there any side effects that the
School needs to know about? -----

I understand that I must deliver the medicine personally to (agreed member of staff)

The above information is, to the best of my knowledge, accurate at the time of writing and I give consent to School staff administering medicine in accordance with the School policy. I will inform the School immediately if there is any change in dosage or frequency of the medication or if the medicine is stopped. I accept that this is a service that the School is not obliged to undertake.

Parent's signature _____ Print Name

Date _____

If more than one medicine is to be given a separate form should be completed for each one.

Appendix 3

RIDDOR - Incidents to be reported

Accidents resulting in death or major injury

Accidents which prevent normal duties for more than 3 days

Loss of consciousness due to asphyxia or absorption of harmful substances

Fractures / Dislocations

Amputation

Loss of sight - temporary or permanent

Chemicals or hot metal burn to eye

Penetrating eye injury

Electric Shock

Injury leading to hypothermia

Unconsciousness needing resuscitation / hospital admission for over 24hrs.
