

What are we learning this week!

This week will be our last week in our topic of Winter. We will be finishing on the story of 'A Winter's Tale'. We will be looking at the bird feeders that we have put up around the Nursery Garden to see if the birds have eaten any food, or if we can see them eating from them. We hope the birds have enjoyed the bird feeders.

Our key group focus will be on recognising numerals to 10.

We have stay and make on Thursday from 3:00-3:30.

In Literacy - Listening to our story, looking at the rhyming words in the story.

In Art - We will be making paper plate robins mixing our own shades with the powder paints. Later in the week, we will be making large hearts for Valentine's Day.

In maths - We will be counting out the polar animals using the interactive white board, matching the numeral to the amount of objects. Later in the week we will be looking at writing the numerals and we will be matching the correct amount of beads to a set number, using threading equipment.

In ICT - We will be using the Bee-Bots, looking at directions of moving around our Winter Wonderland. Looking at up, down, left and right.
