

What are we learning this week!

This week we will be starting our new topic of Winter. Looking this week at Ice. We will look at the different patterns in the Ice using our magnifying glasses. We will have a try at making our own and watching it change back into water seeing how quickly or slowly it melts.

We will be learning the days of the week and our Nursery Golden Rules.

In P.E. we will be learning to climb safely and balance along the bench, using alternate feet.

In Literacy - Having a visit down to the school library we will be looking at books on winter, looking at the books independently.

EAD - Using tissue paper to make stain glass mittens, to achieve a planned effect.

In maths - We will be using the Polar animals to help us count one more. We will then have a try at representing these numbers.

Our Knowledge and Understanding the world work will be based on changes of state, looking at Ice, with the help of the children to make the Ice and then watch it melt.
