21<sup>st</sup> March 2018  Safeguarding Standard

Dear Parents/Carers

Hazeldene has again been buzzing with excitement due to an amazing space themed Science week. It has been crammed full of exciting investigations, workshops and enrichment opportunities.

Here is just a selection of the wonderful activities that have taken place this week:

- undertaken astronaut training with NASA,
- been aerospace engineers by designing, making and launching rockets and developing Martian landing crafts,
- investigated soils on Mars,
- explored the universe with Mathematicians from the University of Hertfordshire,
- Investigated which materials are best at protecting astronauts from harmful UV,
- studied the effects of hydration on urine production,
- analysed Tim Peak's photos from the ISS to see our impact on earth,
- Investigated gravity by exploring meteors and craters,
- Explore the development of flight and possibility to life on other planets in the planetarium.

As part of my evaluation for the week, I'd love to hear any comments you and your child have. Please complete the Parents Voice with your thoughts and the child's voice with theirs. Return completed speech bubbles via book bags as soon as possible.

Many thanks.

Jeanette Pocock
